

Formula 801

Dry Cleaning Solvent

Formula #801 is specifically designed for dry cleaning fabrics using hand or machine cleaning techniques.

Developed to clean “dry clean only” fabrics – **Formula #801** was developed to efficiently clean fabrics which can not be cleaned using traditional wet cleaning methods for upholstery, drapery, or clothing.

Special formulation to loosen and remove varied soil types- The special formulation of selected solvents has given **Formula #801** the ability to remove a wide variety of fabric soils no single dry solvent is able to do. The result is an “across the board” cleaning ability to efficiently bring soiled fabrics back to a high appearance level.

Balanced evaporation cycle – **Formula #801's** selected solvents provide efficient cleaning with a balanced evaporation cycle resulting in reduced chance of increasing flammability. The result is greater safety during the drying process.

Formula #801 can be used with either hand method or machine dry cleaning techniques – With a higher flash point (122° F) **Formula #801** has increased safety when used in conjunction with traditional hand or specifically designed upholstery, drapery, or clothing dry cleaning equipment. The result is increased safety for cleaning personnel and decreased chance of unwanted injury by fire.

*If for any reason you are not thrilled with the performance of **Formula #801** return it to your distributor and we'll get you a product that does.*

Ingredients:

- Odorless Mineral Spirits (CAS 64742-48-9)
 - d-Limonene (CAS 5989-27-5),
 - 2-Propanol-1-Butoxy (CAS 5131-66-8),
 - 2-Methoxymethylethoxy Propanol (CAS 34590-94-8),
 - Alkyloxypolyethyleneoxyethanol (CAS 84133-50-6)
- PH: NA
- Coverage: Varies on application and soiling conditions
 - Fragrance: Mild Solvent
 - Appearance: Clear, yellow liquid
