

# KnockOut1™

## Oxidizing Stain Remover

- » **Knock Out 1** is the next generation in one part oxidizing stain removers that is a convenient, one part, ready to use product, there is no messy mixing or throwing away of mixed formula when you are done.
- » Special additives allow **Knock Out 1** to go well beyond so called magic stain removers. It effectively removes most difficult stains caused by mustard, furniture stains, wood stain, stubborn urine stains, plant stains, and vomit.
- » Stains caused by wine, coffee, tea, juices, berries are no match for **Knock Out 1**.
- » Shoe polish, spray paint, and even the last traces of inks and pigments can be treated with **Knock Out 1**. Not only that, **Knock Out 1** contains encapsulating polymers which aid in spot removal and assist in preventing re-soiling of the treated area.

*For any reason you are not thrilled with the performance of **Knock Out 1** return it to your distributor and we'll get you a product that does.*

### Directions:

1. As a stain remover that contains oxidizing bleach, there is always the inherent risk of color loss on some types and fibers and fabrics. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application
2. **Knock Out 1** is recommended for professional use only on synthetic fibers, carpet, and fabrics. It is not recommended for use on natural fibers and fabrics. Use only as directed.
3. Clean discolored area thoroughly. Remove as much of the staining material as possible with conventional spotting techniques before applying **Knock Out 1**.
4. Apply straight liberally across the affected area of the stain. Allow to dwell five to ten minutes.
5. Agitate with spotting spatula or tamping brush, and blot with clean, colorfast white absorbent towel.
6. Rinse and extract area thoroughly to remove as much of the stain and moisture as possible. If any residual stain remains, apply **Knock Out 1** again. Allow to dry.
7. Do not judge final results until solution has dried. **KEEP CHILDREN AND PETS AWAY FROM TREATED AREA UNTIL IT IS COMPLETELY DRY.**
8. A few specialty stains, particularly mustard and other food items that contain turmeric acid can be lightened over time by the application of an oxidizing stain remover like **Knock Out 1**, and accelerating the chemical reaction with the use of a ultra-violet light (more often called a black light). The higher the intensity of the ultra-violet light, the more likely this procedure will be successful. Typically, a minimum of 2 hours to a maximum of overnight of this procedure is applied.
9. Some advanced stain removal procedures may require the application of heat to accelerate the chemical reaction that essentially makes the stain go away. Occasionally, this procedure may be called for with the use of an oxidizing stain remover like **Knock Out 1**. This is accomplished one of two ways: The use on a steam iron and absorbent white colorfast cotton towels; or a low pressure, high volume steam generator. These are typical wallpaper steamers that were originally made to remove wallpaper. See the label on the **Knock Out 1** bottle or reference guide, for more information.

See the material safety data sheet at [www.cleanmaster.com](http://www.cleanmaster.com) for safety and regulatory information.
