

MultiPhase™

Triple Action Bonding, Encapsulating & Absorbing Odor Counteractant

DEODORANT

RTU pH 5.0 - 5.5

1 : 4

Synthetic and Wool
Carpet and
Upholstery

- » A binding, bonding, encapsulating, pairing, and absorbing deodorizer that will safely and effectively eliminate odors most commonly encountered by the professional carpet cleaner, including pet urine, tobacco smoke, mustiness and mildew, and vomit.
- » Great at neutralizing urine odors
- » A fragrance that has become the industry favorite to leave the environment with a refreshed smell.
- » Can be fogged, sprayed, injected or used as an additive
- » Contains no enzymes, oxidizers, bacteria, or chemical desensitizers
- » Can be used straight or diluted up to 32:1. Most common mixture is 4:1
- » Can be effectively used to treat malodors on carpet

If for any reason you are not thrilled with the performance of MultiPhase return it to your distributor and we'll get you a product that does.

Directions:

1. For best results, locate all areas which are sources of odor. Remove as much odor producing source material through effective cleaning. On large pet urine deposits, pre-treat area with **CleanMaster UPS** during cleaning. Then, saturate affected areas with mixed **MultiPhase** equal in proportion to the amount of odor producing material. **MultiPhase** must come in contact with the source of the odor to work most effectively. Pre-test all application surfaces for colorfastness before proceeding. Apply all solutions in accordance with industry best practices and standards of care.
2. For most applications: Mix **MultiPhase** 1 part solution with 4 parts water. On severe urine contamination, you can use a more concentrated mixture or even straight, depending upon severity of the odor.
3. On urine contamination: Inject or saturate mixed **MultiPhase** directly into the carpet, backing, and cushion. Allow to dwell 5-20 minutes. Extract area thoroughly, preferably with sub-surface extraction tool.
4. For use as fogging deodorizer: Mix 1 part **MultiPhase** with 3 parts of water. Protect water sensitive surfaces. Never inhale atomized or fogged solutions.
5. As a cleaning additive: For portable extractor, mix 2 ounces of **MultiPhase** with each gallon of pre-mixed extraction detergent or neutralizing rinse. For truckmounted equipment, mix 1 quart of **MultiPhase** with 5 gallons of pre-mixed concentrated extraction detergent or neutralizing rinse. For low moisture encapsulation cleaning, mix two ounces of **MultiPhase** with each mixed gallon of encapsulation solution.

See the material safety data sheet at www.cleanmaster.com for safety and regulatory information.
