

RX20 NEXT GEN

Rotary Jet Extractor® The Stakes have been RAISED!

The RX20 set the standard for Rotary Jet Extraction® cleaning, with over 25,000 units sold over the last 35 years. HydraMaster introduced rotary extraction cleaning with three primary goals: a higher level of cleaning performance in a carpet cleaning wand, faster drying; and reducing fatigue for the cleaning technician. Now HydraMaster is raising the stakes in rotary extractors with the introduction of the RX20 NEXTGEN, a new tool that redefines that standard and “ups the ante.” Enhancements to the world’s best rotary extractor were made by carefully listening to the input of cleaning and restoration contractors worldwide:

- *Easier to handle and more comfortable to operate.*
- *Extends your deep cleaning reach and optimizes productivity with an on-board crevice tool to vacuum to the edges and corners.*
- *Your customer can see extracted water and soil through the site tube in the on-board crevice tool.*
- *The handle has been ergonomically enhanced and re-designed for operator comfort.*
- *On-board detailed operation instructions make it easier to train new technicians.*
- *An additional switch sustains head rotation and allows for operation with left hand only.*
- *New no-slip handle locking mechanism.*
- *Streamlined manufacturing processes without compromising performance, reliability & durability.*

“It is kind of like that famous battery bunny. It just keeps going and going and going...”
Bruce D

How does the RX20 NEXTGEN Clean Faster and Better?

It cleans the carpet fiber from 5 different angles. With 3 spray jets matched with 5 vacuum slots that are independently suspended by a flexible spring arm, the RX20 NEXTGEN makes over 650 cleaning passes per minute. This super agitation, combined with the unit's weight cleans a carpet deeper, extracting soil and cleaning solution. The rotating head cleans all sides of the carpet fiber, fluffing up and restoring the pile. The self-propelled RX20 NEXTGEN glides over the carpet; the rotary action of the cleaning head does all the work. The RX20 NEXTGEN sweeps back-and-forth with just a slight change of balance on the handle. The effort needed to use an RX20 NEXTGEN is a fraction of that used scrubbing back and forth with a wand. Best of all, the extraction recovery performance of the RX20 NEXTGEN dries the carpet faster than ever. The results are astounding, especially on extremely soiled, matted carpet.

Rotary Jet Extractor® Total Floor Care System

The RX20 is not just a carpet extraction tool... Another often overlooked feature of the RX20 NEXTGEN is its ability to extract standing water, particularly on glue down commercial carpets. An independent water extraction test by a leading trade association demonstrated that heavier rotary extraction wands like the RX20 NEXTGEN did a better job at extracting water from glue down carpets than many wands specifically designed for water extraction only. In fact, even on residential style carpet the RX20 outperformed many so called dedicated extraction wands at water recovery from a flooded carpet. Multiple passes of head across the carpet ensures a higher level of water extraction and faster drying. Finally, just like in cleaning, when using the RX20 NEXTGEN for water extraction, it reduces fatigue, and keeps up maximum extraction even when the restoration technician is worn out.

Low moisture carpet cleaning – bonnet or encapsulation

- RX Pad and Bonnet Driver
This attachment allows the RX to quickly convert to drive either carpet cleaning bonnets or standard hard floor pads. Part No. 190-041-024

Hard surface floor deep cleaning, stripping, or scrubbing – luxury vinyl tile, ceramic or porcelain tile, natural stone, an even finished concrete

- RX Hard Floor Attachment - LD
Suitable for Light Duty (LD) scrubbing of vinyl, terrazzo, slate and marble surfaces. The brush on this attachment replaces red pads. Part No. 190-041-024
- RX Hard Floor Attachment - MD
Suitable for Medium Duty (MD) to aggressive scrubbing and stripping of resilient floors, terrazzo, quarry tile and concrete floors. The brush on this attachment replaces brown and black pads and will outlast them more than 100 to 1. Part No. 190-041-025
- RX Hard Floor Attachment - HD
Designed for Heavy Duty (HD) to most aggressive stripping and scrubbing of resilient floors, terrazzo, quarry tile and concrete floors. The brush on this attachment replaces high productivity pads. Part No. 190-041-025

SPECIFICATIONS	PART NO. 700-041-006
Body	Cast Aluminum Powder Coated
Length	23 inches
Base width	16 inches
Height	43 inches
Weight	70 lbs.
Motor	1/2 H.P. TEFC
Amperage	8.6
Voltage	120 Volt, 60 Cycle
European models	220 Volt, 50 Cycle
Gearbox	Permanent Lube Spur Drive, 1725 RPM Input, 130 RPM Output
Oil capacity	12 Ounces
Star headplate	Replaceable, Steel Spring Arms
Cleaning heads	Five (5) Cast Aluminum Replaceable Stainless Steel Wear Shoes
Solution jets	Stainless Steel, 80015 T-Jet
Solution strainer/	80 Mesh, Stainless
Solution valve	
Cleaning rate	Stainless Steel, High Pressure Five (5) Heads Rotating at 130 RPM equaling 650 Cleaning Passes Per Minute
Handle assembly	Foam Grips, Adjustable Height
Transportation/	
Wheels	8" dia., 1-1/2" Wide; Grey, Non-Marking
Electric cord	50', 14/3

RX Hard Floor Attachment

RX Pad or Bonnet Driver Attachment
