Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in conjunction therewith. The user should thoroughly review the material safety data sheet for this product and follow recommendations for mixing, application, disposal, and the use of any applicable personal protective equipment (PPE). The manufacturer, distributor, and seller of this product warrant that the chemical contained herein conforms to its standard specifications.

Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. The manufacturer and seller make no representation or warranty, including merchantability or any other kind, expressed or implied. The foregoing may not be altered except by written agreement by officers of the manufacturer.

HydraBoost CT is a powdered, high-powered concrete and tile and grout cleaner and degreaser designed to safely and effectively dissolve, break down, dislodge, and emulsify even the grimeiest soils from concrete, finished concrete, and ceramic, porcelain, and quarry tile floors and surfaces. HydraBoost CT is an economical cleaner and degreaser designed to penetrate porous surfaces and dissolve the toughest build-up of oil and grease. Alkaline cleaning agents and heavy duty surfactants are activated by the power of oxygen to allow the effervescent solution to get into every crack, crevice, and pore. It is the ideal cleaning agent for heavily soiled restaurant kitchen tile floors and other indoor and outdoor surfaces exposed to high levels of grease and oil contamination. It does so without the use of harsh chlorinated solvents or mineral spirits, leaving the surface squeaky clean and residue free. HydraBoost CT is specifically designed to work in conjunction with high powered hard surface cleaning wands such as the RX-20 with hard floor attachments, and rotary or stationary hard surface cleaning extraction wands. Its powerful formula though, will work with virtually any brush agitation system, automatic floor scrubber, or even a mop and bucket cleaning system. HydraBoost CT is designed to be used as a preconditioning agent and applied to the surface being cleaned first. The oxygenated cleaning power of HydraBoost CT also makes it an ideal boosting agent for trashed and neglected carpet that has been exposed to high levels of oxygenated oils and grease. Simply add a couple of ounces of HydraBoost CT to your favorite traffic lane cleaner/preconditioner for the ultimate in cleaning power.

## Directions:

1. Read entire label before using. Use only as directed. Always pretest surface with cleaning solution for color-fastness prior to cleaning. Ensure work area is well-ventilated during application. Keep children and pets out of the area during application and drying. HydraBoost CT is not recommended for cleaning natural stone floors.
2. This product is ultra-concentrated. For normal soiling: mix 2 ounces of HydraBoost CT powder with 1 gallon of warm or hot water into a professional sprayer. For extreme soiling: mix 3 to 4 ounces of powder with 1 gallon of warm or hot water into a professional sprayer. For application through a in-line injection sprayer: mix 12 oz. of powder and fill container with water. Use 4:1 dilution.
3. Apply mixed solution with sprayer evenly and liberally across surface to be cleaned. You can use a pump-up sprayer or a battery powered sprayer. If preferred, you can apply mixed solution with a damp mop, sponge, or other appropriate professional equipment. If using a mop for solution application and surface cleaning, change your mop water often to make sure that soil is not re-deposited.
4. Allow for 5 -10 minutes of dwell time. For concrete, if stains have been deeply absorbed, allow 15 minutes of dwell time so the solution has time to reach into the concrete pores and crevices and the oxygen activated effervescent solution can dissolve the soiling and lighten discoloration.

5. For best results, agitate and extract cleaning solution using warm or hot water and a rotary agitation hard surface cleaner such as a the RX-20 with hard floor attachments, or rotary or stationary hard surface cleaning extraction wands For tight spaces or especially sensitive surfaces, use a hard surface cleaning wand, or simply mop to rinse with clean warm or hot water.
6. When area has been rinsed thoroughly. Allow floor to dry.
7. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.

## For use as a carpet cleaning solution booster/additive:

1. Mix 2 ounces of HydraBoost CT with each gallon of mixed pre-spray (traffic lane cleaner, preconditioner) solution. This mixture is not recommended for wool carpeting or residential nylon carpets that are being properly maintained.
2. Always pretest surface with boosted cleaning solution for color-fastness prior to cleaning.
3. Proceed to apply the pre-spray and continue cleaning in accordance with the directions of the pre-spray.

**Contents:** Sodium carbonate (497-19-8), sodium percarbonate (15630-89-4), trisodium phosphate (10101-89-4), sodium metasilicate (6834-92-0), alcohol ethoxylate (68439-46-3), d-limonene (5989-27-5), proprietary surfactant, proprietary sequestant.

## GHS U.S. – CLASSIFICATION: WARNING

Harmful if swallowed. Causes skin irritation.  
Causes serious eye irritation.

## PRECAUTIONARY STATEMENTS (GHS-US)

The product is classified and labeled according to the Globally Harmonized System (GHS)

If medical advice is needed, have product container or label at hand.  
Keep out of reach of children. Read label before use.  
Wash skin and contaminated clothing thoroughly after handling.  
Do not eat, drink or smoke when using this product.  
Wear suitable protective gloves/protective clothing/eye protection/face protection.  
IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.  
IF ON SKIN: Wash with plenty of soap and water.  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
If skin irritation occurs: Get medical advice/attention.  
If eye irritation persists: Get medical advice/attention.  
Dispose of contents/container in accordance with local/regional/national/international regulations.

**CLASSIFICATION SYSTEM:** NFPA/HMIS Definitions: 0-Least, 1-Slight, 2-Moderate, 3-High, 4-Extreme.

NFPA RATINGS (SCALE 0-4): Health = 2, Fire = 0, Reactivity = 0

HMIS RATINGS (SCALE 0-5): Health = 2, Fire = 0, Reactivity = 0
