

MAXXTREME

PreSpray™

Heavy Duty Powdered Pre-spray For Extremely Soiled Carpeting and Tile

Some floors are simply so dirty and heavily soiled you just have to throw the works at them. That is what MAXXTREME is all about. By using the cleaning power of alkalinity and combining state of the art low foaming surfactants and grease busting solvents, it binds, emulsifies, dissolves, breaks down and melts away the grimeiest of soils.

PRE-SPRAY

RTU pH 11.5 - 12.0

1:32-64

Synthetic Carpets

Tile and Grout
(Not recommended for
stone or glazed tile)

Concrete

If for any reason you are not thrilled with the performance of Maxxtreme return it to your distributor and we'll get you a product that does.

Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in conjunction therewith. The user should thoroughly review the material safety data sheet for this product and follow recommendations for mixing, application, disposal, and the use of any applicable personal protective equipment (PPE). The manufacturer, distributor, and seller of this product warrant that the chemical contained herein conforms to its standard specifications.

Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. The manufacturer and seller make no representation or warranty, including merchantability or any other kind, expressed or implied. The foregoing may not be altered except by written agreement by officers of the manufacturer.

Some floors are simply so dirty and heavily soiled you just have to throw the works at them. That is what MAXXTREME is all about. By using the cleaning power of alkalinity and combining state of the art low foaming surfactants and grease busting solvents, it binds, emulsifies, dissolves, breaks down and melts away the grimeiest of soils. MAXXTREME is a non-enzyme mixture so it does not require long dwell times to break down the grimeiest soil. MAXXTREME dissolves easily in warm and hot water and starts to work immediately by dissolving grease and oils on contact. Unique buffering processes allow MAXXTREME to keep a stable pH for continuous cleaning power. Being a super concentrate powder, MAXXTREME will save you money. The versatility of MAXXTREME will allow you to effectively clean trashed and neglected carpets in high soil environments like restaurants and dirty apartments, as well as tile and grout hard surface floors. MAXXTREME is VOC compliant in and does not contain any harmful butyl solvents, and leaves the carpet or tile with no sticky residue that can cause rapid re-soiling. A nice, but not overpowering fresh citrus fragrance leaves the floor and the room smelling fresh and clean.

Directions:

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. For increased efficiency, apply MAXXTREME with an injection sprayer to take advantage of solution pressure and heat created by your high performance portable extractor or truckmount. You can also use a "pump-up" pressure sprayer, or electric or battery powered sprayer. Apply in even overlapping patterns
3. Mix 2 oz. of powder per gallon of hot water for pump-up sprayer. For an in-line injection sprayer, mix 10 oz. of chemical per 5 quarts of hot water. Shake well for compete mixing.
4. Spray evenly across the carpet. Allow 3-5 minutes for dwell time. Do not allow to dry
5. Extract with a compatible alkaline extraction detergent or acid/neutralizing rinse. For faster cleaning, reduced fatigue, and more effective soil removal, extract with the RX20 NEXTGEN Rotary Extraction Tool or EVOLUTION RX12 Rotary Hard Surface Extraction Tool. In furniture dense environments on carpet, use the EVOLUTION cleaning wand.
6. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.

Contents: Sodium Metasilicate Anhydrous, Sodium Tripolyphosphate, Trisodium Phosphate, Dipropylene Glycol Monomethyl Ether, Propylene Glycol N-Butyl Ether, Ethylenediamine Tetraacetate Tetrasodium salt, Non-hazardous biodegradable surfactant.

Instrucciones:

1. Antes de la aplicación, pruebe previamente todas las soluciones de limpieza en un área discreta para determinar la solidez del color.
2. Para una mayor eficiencia, aplique MAXXTREME con un pulverizador de inyección para aprovechar la presión de la solución y el calor creado por su extractor portátil de alto rendimiento o montaje en camión. También puede usar un rociador a presión de "bombeo" o un rociador eléctrico o con batería. Aplicar incluso en patrones superpuestos
3. Mezcle 2 oz. de polvo por galón de agua caliente para pulverizador de bombeo. Para un rociador de inyección en línea, mezcle 10 oz. de producto químico por cada 5 cuartos de agua caliente. Agite bien para competir mezclando.
4. Rocíe uniformemente sobre la alfombra. Permita 3-5 minutos para el tiempo de permanencia. No dejar secar
5. Extraer con un detergente alcalino de extracción compatible o un enjuague ácido / neutralizante. Para una limpieza más rápida, una fatiga reducida y una eliminación de suciedad más efectiva, extraiga con la Herramienta de extracción rotativa RX20 NEXTGEN o la Herramienta de extracción rotativa de superficie dura EVOLUTION RX12. En ambientes densos de muebles en alfombras, use la varilla de limpieza EVOLUTION.
6. Para un secado más rápido, especialmente en ambientes húmedos, considere el uso de un motor de aire axial, centrífugo o descendente después de la limpieza.

Please Rinse and Recycle this Container

GHS U.S. – CLASSIFICATION: WARNING

Harmful if swallowed. Causes skin irritation. Causes severe eye damage. May be harmful if inhaled. May cause respiratory irritation. Avoid breathing dust. Do not get in eyes, on skin, or on clothing. Wear protective gloves/ protective clothing / eye protection/ face protection Concentrate form. Use in well ventilated area

PRECAUTIONARY STATEMENTS (GHS-US)

The product is classified and labeled according to the Globally Harmonized System (GHS)

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

If in eyes: rinse copiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing.

If on skin: Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

If swallowed: Rinse with water. Do NOT induce vomiting. Call a POISON CENTER/ doctor if you feel unwell.

If inhaled: Remove person to fresh air and keep comfortable for breathing.

Before using, read materials safety data sheet for this product.

CLASSIFICATION SYSTEM: NFPA/HMIS Definitions: 0-Least, 1-Slight, 2-Moderate, 3-High, 4-Extreme.

NFPA RATINGS (SCALE 0-4): Health = 2, Fire = 0, Reactivity = 0

HMIS RATINGS (SCALE 0-5): Health = 2, Fire = 0, Reactivity = 0
