

# MAXX TREME

PreSpray™

## Heavy Duty Powdered Pre-spray For Extremely Soiled Carpeting and Tile

Some floors are simply so dirty and heavily soiled you just have to throw the works at them. That is what MAXXTREME is all about.

By using the cleaning power of alkalinity and combining state of the art low foaming surfactants and grease busting solvents, it binds, emulsifies, dissolves, breaks down and melts away the grimeiest of soils.

**MAXXTREME Prespray is your FIRST CHOICE for LAST RESORT Cleaning for synthetic carpet and ceramic or porcelain tile.**

**It isn't just for restorative cleaning, it's for resurrection cleaning.**

### You know the jobs I am talking about:

- People who could easily star on the television show hoarders
- The guys and gals who rebuild their motorcycle engines... in their living room, because it is too cold outside.
- That restaurant that has apparently never heard of using a degreaser in their kitchen.
- Folks who don't take very good care of their floors and expect you to perform a miracle
- More cleaning power packed inside, you aren't paying to ship water
- MAXXTREME will cost you only around 70 cents per mixed gallon

### Directions:

Please read the full label directions before cleaning.

1. Pre-test all cleaning solutions in an inconspicuous area for colorfastness.
2. For increased efficiency, apply MAXXTREME with an injection sprayer to take advantage of solution pressure and heat created by your high performance portable extractor or truckmount. You can also use a "pump-up" pressure sprayer, or electric or battery powered sprayer. Apply in even overlapping patterns
3. Mix 2 oz. of powder per gallon of hot water for pump-up sprayer. For an in-line injection sprayer, mix 10 oz. of chemical per 5 quarts of hot water. Shake well for complete mixing.
4. Spray evenly across the carpet. Allow 3-5 minutes for dwell time. Do not allow to dry
5. Extract with a compatible alkaline extraction detergent or acid/neutralizing rinse. For faster cleaning, reduced fatigue, and more effective soil removal, extract with the RX20 NEXTGEN Rotary Extraction Tool or EVOLUTION RX12 Rotary Hard Surface Extraction Tool. In furniture dense environments on carpet, use the EVOLUTION cleaning wand.
6. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.

Available in: 1 Gallon; Case of 4 x 1 Gallon

Part # 950-148-B
