

# EscalatorTread Spot Cleaner

**SPOTTER**

Escalator and  
Moving Walkway  
Tread Spot Cleaner

Specially Developed for Escalators and Moving Walkways

No shock hazard, no flammability hazard, and no water to interfere with proper escalator operation. Designed for best use with TreadMaster™ escalator cleaning machines.

A specialized blend of cleaning agents, EscalatorTread Spot Cleaner is a fast-acting spot cleaner safe for use on most escalators.

- Specially developed to work with the TreadMaster® Escalator Cleaning System, this fast acting spot cleaner is designed especially for use on aluminum escalator steps. EscalatorTread Spot Cleaner is non-flammable and non-conductive so it can be used while motor and equipment are operating.
- Specially developed to work with the TreadMaster® Escalator Cleaning System, this fast acting spot cleaner is designed especially for use on aluminum escalator steps. Spot Cleaner is non-flammable and non-conductive so it can be used while motor and equipment are operating
- Spot Cleaner is non-flammable and non-conductive so it can be used while motor and equipment are operating. It is non-conductive to over 18 KV per ASTM D-877 and will not cause “freeze out” or attract moisture when used as directed.
- It quickly and easily removes dirt, dust, light oils, and other deposits from escalator treads and other electronic components and devices.

#### Use Directions:

For best results, use at top of the escalator while it is operating and with the TreadMaster™ cleaning machine in place. Spray over surface of spots and discolored areas as required. No further brushing or wiping is needed when used with the TreadMaster™ System. Always use with adequate ventilation. Avoid contact with bearings. Avoid contact with plastic or rubber.

This solvent is non-conductive so it can be used while motors and equipment are operating.
