

Complete Guard

- **Protect your carpet from unsightly spills and stains**
- **Extend the life of your carpet investment**
- **Make vacuuming and spill clean-up quicker and easier**

Why Do You Need Complete Guard?

Complete Guard outperforms the famous brand carpet protectors because it **protects your**

carpet investment and appearance in three ways:

Dyeblockers protect the fiber from the inside of the fiber out and are the main technology to protect your carpet from unsightly stains.

Soil resisters create a surface tension across the top of the carpet. They provide water and oil based spill repellency and soil resistance. They are the most important element in keeping the soil from working its way down into the carpet.

Finally **polymers** leave a coating on the carpet and protect the carpet from the outside in and keep the soil or spilled material from attaching to the carpet.

Complete Guard Carpet & Fabric Protector is manufactured by HydraMaster, a leading provider of professional carpet & upholstery cleaning solutions for the professional cleaning contractor.

50 years of cleaning industry experience allow HydraMaster to formulate the most effective stain and soil preventing fabric protector on the market today. Because the technology in Complete Guard requires the technical know-how of a trained professional carpet cleaner to be properly applied and cured, you won't find Complete Guard at your local Home Improvement store or even your favorite carpet retailer. Complete Guard is only available from your trained professional carpet cleaner.

Complete Guard Carpet & Fabric Protector

The Homeowner's Advantage

Even if you purchased a 'stain resistant' carpet, chances are that the coatings they applied at the carpet factory are wearing off. Their effectiveness is reduced over time by traffic, soil abrasion, and many common cleaning, disinfecting, and fragrance products used in the home. Complete Guard will restore the "factory fresh" stain and soil resistant performance of your carpet to "like-new" condition or even better. If you purchased a carpet constructed of olefin, polyester, or Triexta fiber, they may have told you it is naturally stain resistant. What they did not tell you is that those fibers are oil-loving and left untreated will ugly out long before they wear out. Applying the 3 tier technology of Complete Guard will provide the highest level of oil based soiling and spill protection to your carpet, even better than it came from the factory!

The Noticable Difference

Nylon stain resistant carpet stained with a children's fruit drink, exposed to the equivalent of 18 months to 2 years of traffic, wear, and exposure to commonly sprayed household disinfectants and cleaners

with Complete Guard,
applied to restore protection

without Complete Guard

Of course, no carpet is ever "stain-proof" despite what you might hear in ads. Even a fully protected carpet can be stained by some harsh materials and spills, especially if the spilled material is left on the carpet for an extended period of time before being wiped, blotted, or extracted up. You can rest assured that Complete Guard Fabric Protector provides you with the safest, most environmentally conscious, and effective performance on the market today. Let your cleaning technician know which rooms you think need protected the most!
