

Bacteria does not leave footprints on your luxury vinyl plank floors

Studies show that Luxury Vinyl Plank Floors can harbor bacterial contaminants, construction and drywall dust, tracked fecal matter, oil-based soiling, and other unwanted substances. The grooves and textures in your flooring do not allow a mop or scrubber to fully remove many of these substances.

Our deep cleaning process utilizing HydraMaster Hydra-Fresh LVC Restorative Cleaner, combined with professional floor cleaning equipment will restore and revitalize the appearance of your floor, remove or extract harmful contaminants, and resist rapid re-soiling.
