

EVOLUTION WAND

Hard Surface Brush Glide

- The New EVOLUTION Hard Surface Brush Glide Easily converts your 13", 1.5", 2-jet EVOLUTION wand into a safe and efficient hard surface cleaning wand.
- Easily clean Luxury Vinyl Plank/Tile, laminate floors, tile & grout, and other *hard surface floors* with your EVOLUTION carpet cleaning wand.
- Unlike with most wands, The EVOLUTION Hard Surface Brush Glide can easily be installed set with enclosed set screws. Since the EVOLUTION WAND has a built-in glide holder there is no need to heat up or mold the glide when installing.
- 200-500psi is all you need to effectively use this brush glide, meaning that your 500psi portable extractor like the PEX500 can now serve as an effective carpet and hard surface cleaning machine, **especially when used in conjunction with the right cleaning solution, dwell time, and some mechanical agitation. It also works extremely well with your truckmount!**
- Make sure that your jets are aligned correctly and striking just behind the Glide, and your lint filters are not plugged and your waste tank gasket is 100% when using your wand for this purpose. You will get excellent water recovery and leave the floors almost dry when you are finished. (Some post cleaning drying steps may be necessary)

NEW

Deeper Cleaning ° Faster Drying ° Reduced Fatigue

Your EVOLUTION Hard Surface Brush Glide is made of the same strong and long lasting Black Delrin as your original Evolution Wand Glide.
